

## **SPECIFICATION AMENDMENTS**

**[0002]** Please replace paragraph [0039] (of the published application, 2005/0210501) with the following:

**[0003]** (Please note that the paragraph at page 12 of the application as filed, from line 9 to line 19, did not include the below typographical error that is seen in paragraph [0039] of the published application 2005/0210501.)

[0039] If updated metadata is available for one or more of the recorded programs (block 408), the client device retrieves the updated metadata associated with ~~the I recorded~~ the recorded programs (block 410). The client device then displays the recorded programs using the metadata associated with the recorded programs (block 412). Updated metadata may include revised information regarding a program, such as a revised program length (shorter or longer than originally scheduled) or an updated is program rating (e.g., from TV-14 to TV-M, or from previously unrated to TV-Y). Updated metadata may also include additional data regarding a program, such as the results of a sporting event, awards received after the program is broadcast, and the like. The display of recorded programs may be similar to the listing of recorded programs shown in FIG. 2.
